Other Models And Modes To Use

- Auto: The model automatically decides how long to think before giving an output.
- Instant: Get answers fast
- Thinking mini: AI thinks fast before giving an answer
- Thinking: AI thinks longer for better answers
- GPT-4o: Helps with most daily general use cases.
- o3: Helps with better coding and problem-solving tasks.
- o4-mini: Helps the best with problem-solving and coding tasks.
- GPT-4.1: GPT-4's souped-up sibling, supercharged for coding, instruction-following, and wrangling massive 1-million-token contexts

Customize ChatGPT

- Click on your profile.
- You'll get the option to customize ChatGPT.
- Let ChatGPT know about you and how you want outputs from ChatGPT. This is where ChatGPT understands your taste in writing too.

Settings

1. You can change the theme color of your ChatGPT
2. You can enable or disable in Personalization section if you want ChatGPT to remember your chat history.
3. You can use connectors to connect your favorite apps to ChatGPT
4. You can manage your scheduled tasks on the Schedules section
5. You can manage your chat data settings in the data controls section
6. In the security section, you can manage your security settings to keep your account safe.
7. In the account section, you can manage your plans and also create your GPT builder profile which will show up when someone uses your GPTs.

Prompting Framework

Role → Define who ChatGPT should act as.

Task → State the exact job to do.

Context → Provide background details, constraints, and boundaries.

Reasoning → Explain how ChatGPT should think internally.

Output Format → Decide how results have to be structured.

Stop Conditions → Specify when the task is considered done.

Shushant Lakhyani
Building TechnoBizzVault

Prompt Framework

Act as [ROLE] focused on [TASK].

- Context: [Insert background, constraints, and exclusions here].
- Reasoning: [Explain how ChatGPT should internally validate, analyze, and optimize before responding].
- Output Format: [Specify table, list, bullets, markdown, etc.].
- Stop Conditions: [Define when the task is complete and requirements are satisfied].

Shushant Lakhyani
Building TechnoBizzVault

Example Prompt

Act as a productivity consultant focused on creating personalized daily routines for remote workers.

- Context: The routine must balance productivity, wellness, and flexibility. It should exclude cliché advice like "wake up early" and instead focus on realistic, modern practices.
- Reasoning: Cross-check suggestions with evidence-based productivity methods (Pomodoro, deep work, habit stacking) and adapt them for remote work challenges. Optimize for balance and sustainability.
- Output Format: Provide the routine as a structured daily timeline with time blocks, activity descriptions, and purpose.
- Stop Conditions: Task is complete when one validated, evidence-backed, realistic daily routine is created, presented in a clear timeline format.

Custom GPTs

- SciSpace: Do hours worth of research in minutes.
- Wolfram: Access computation, math, curated knowledge & real-time data from Wolfram.
- Video GPT by VEED: Generate and edit videos with text prompts.
- Canva: Effortlessly design anything: presentations, logos, social media posts, and more.
- Logo Creator: Use me to generate professional logo designs and app icons.
- Data Analyst: Drop in any files and I can help analyze and visualize your data.

More Custom GPTs

- Copywriter GPT – Marketing, Branding, Ads: Dive into viral marketing strategies fine-tuned to your needs.
- Whimsical Diagrams: Explains and visualizes concepts with flowcharts, mindmaps, and sequence diagrams.
- Universal Primer: The fastest way to learn anything hard.
- Grimoire: AI code wizard.
- Sora: Generate videos.

OpenAI 4o Image Generation Prompt Template

[Main Subject/Scene] | [Style/Medium] |
[Lighting/Mood] | [Color Palette] |
[Composition/Camera Angle] | [Extra Details for
Realism/Creativity]

Shushant Lakhyani
Building TechnoBizzVault

OpenAI Sora Video Generation Prompt Template

[style/genre] video of [subject/scenario] set in [location/environment] with [camera angle/movement]. The mood should be [tone/mood], and the colors should be [color scheme]. The video length should be [duration], and it should include [specific details/effects, e.g., slow motion, transitions, lighting effects]. Ensure the visuals are [realistic/cinematic/animated/etc.]

Shushant Lakhyani
Building TechnoBizzVault

Prompting Techniques

- Add background context, be specific and clear.
- Ask for step-by-step explanations.
- Divide questions into points.
- Mention how you want the output with examples.
- Mention if you want the output in a file.
- Add input files if required.
- Follow up till you get the best output.
- Add restrictions.

Shushant Lakhyani
Building TechnoBizzVault

Do's

- Be clear with your prompt task.
- Add background context in prompts for better outputs.
- Follow-up for better results.
- Experiment with different prompt frameworks.
- Verify facts by checking sources.

Shushant Lakhyani
Building TechnoBizzVault

Don'ts

- Don't expect 100% accuracy.
- Don't share sensitive personal data.
- Don't rely on it for legal/medical advice.
- Don't copy-paste without checking.
- Don't treat AI outputs as final truth.
